

# CEMENTFABRIKEN WALLCLADDING

## PHILOSOPHY

This collection is all about simplicity and elegance. Simplicity brings to us the profound feeling of peace and serenity. It provides the necessary space for achieving a state of mental relaxation. We are dedicated to being part of creating beautiful spaces where people can meet and ideas can flow freely. And at the same time, capture the true elegance of **"less is more"**.

Cementfabriken's mission is to meet the demands of professionals in architecture and interior design. We represent a new generation of innovative coatings for all types of surfaces.

Our wallcladding products consist of a collection of large-format tiles that stand out for their resistance, durability, and design. It was created specifically for the most exclusive and demanding projects.

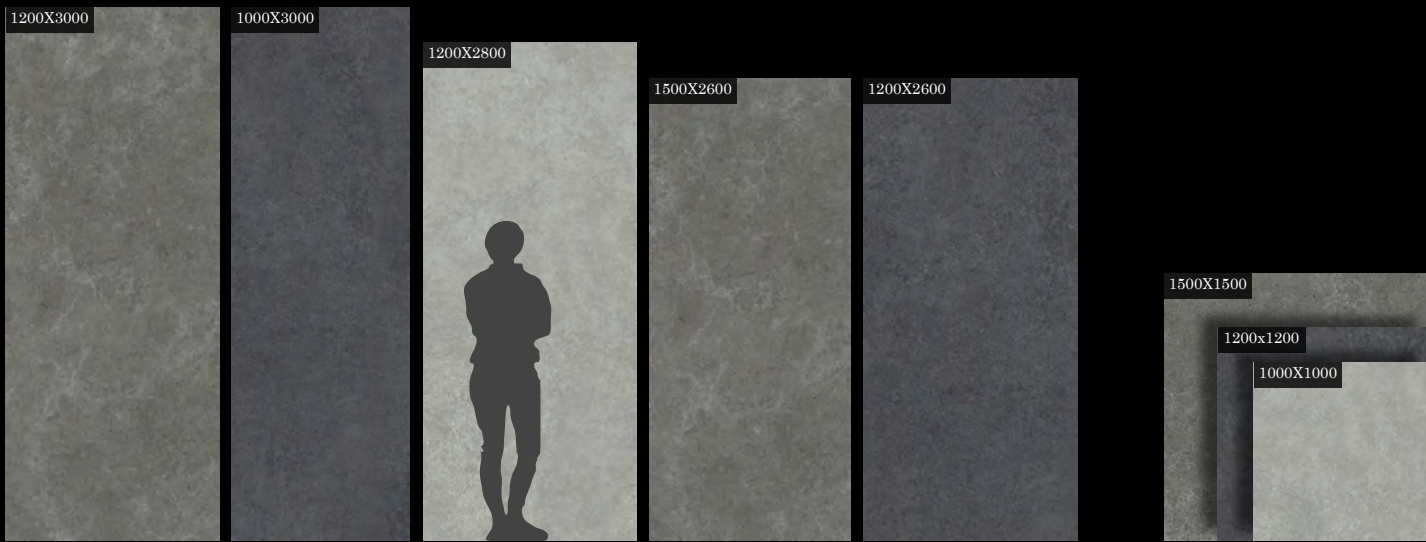

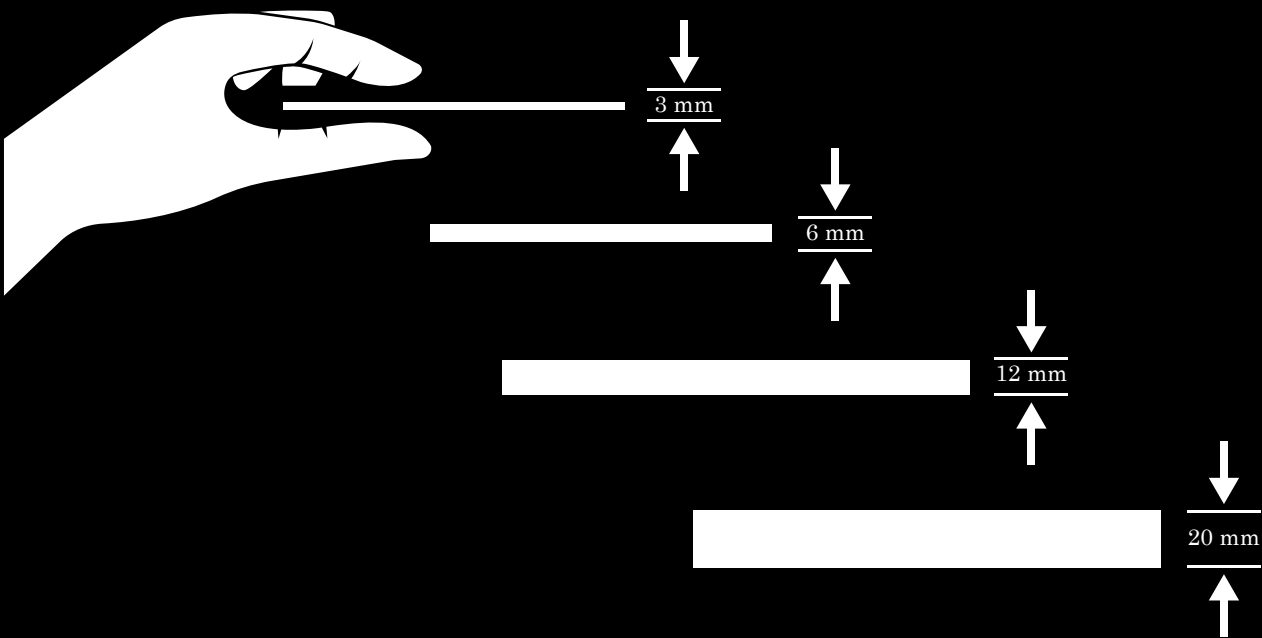

## SEAMLESS SURFACES

Our concept is to reduce things to their most essential selves. We strive for beautiful designs that, due to the possibility of seamlessness, create a simplicity so absolute that you could not possibly want to remove anything to improve it further. With the interior design of your choosing, it should, in the end, create a space where simplicity and design intertwine.

**Reduce, Simplify, Unify.**

# SMOKE

People have communicated with the help of smoke for thousands of years. By burning different materials, they could achieve different colors of smoke. In that way, people were able to inform others far away about gatherings, warnings, and news. This design is available in four smoky colors that will give your space a touch of history and elegance.

## CuZn

Copper and zinc have played an important role in design and architecture for thousands of years. These metals respond to their environment and change over time. The outer patina arises naturally when copper and zinc come into contact with water and salt. This design imitates that effect.

# ANTARCTICA

The discovery of Antarctica in 1820 would later spark the dramatic race to the South Pole between Roald Amundsen and Robert Falcon Scott. With just a month's difference, the Norwegian Amundsen reached the South Pole before Scott. You could imagine that the vast polar desert must have felt lonely for both parties in 1911 when they set off for their expeditions. This design should resemble Antarctica's calm yet dramatic landscape.
